- Use with Animal Collars
- Up to 10,000 Buffer Messages

The GL320MG is the LTE version of our best-selling GL300, which is the most popular series in our range of asset trackers with large deployments worldwide. It is used for a wide range of applications which require real-time location knowledge, such as private investigations, package delivery, temporary tracking of vehicles, long distance transportation, endurance racing and animal management. As one of the market leaders in reliable battery powered asset trackers, our products are targets for imitation, but we are happy to say that up to this day, our GL300 still leads the field in battery life and overall performance.
